Lead Product Designer with 8 years of experience driving AI-powered enterprise innovation from early concept through large-scale adoption. **Head of Product Design at Genway**, leading hands-on AI product definition and validation. Previously led AI innovation at **Microsoft Teams**, shipping complex enterprise features.

Specialized in **translating ambiguous requirements and complex data** into intuitive, user-centric AI experiences. Experienced in using **rapid prototyping to model AI behavior**, aligning stakeholders early and accelerating iteration. Passionate about ethical, inclusive AI and creating polished, production-ready experiences in fast-moving, cross-functional teams.

Patents

- **Optimal Resolution Selection For A Video Stream**, 2025, US-20250358433-A1
- **Generating A Gallery View From An Area View**, 2022, US-20240104699-A1
- **Botcasts - AI Based Personalized Podcasts**, 2021, US-20230092783-A1
- **Providing Responses To Queries Of Transcripts Using Multiple Indexes**, 2021, US-20220414130-A1

Experience

Head of Product Design - Genway 2025 – Present
Genway AI

- Leading **product design for an AI-moderated research platform** serving **B2B and B2C** product and marketing teams.
- Designing **agentic AI research workflows**, translating interviews into **actionable insights** through rapid prototyping and validation.
- Leading **one to two external designers** from a partner studio, defining scope and priorities aligned with product goals.
- Leading **brand and product storytelling initiatives**, including investor pitch decks, product videos, and creation of a custom **AI agent for UX writing** to support scalable, consistent product copy across a lean team.
- Driving **onboarding optimization and conversion improvements**, increasing the number of users successfully creating their first research project through iterative UX refinement.

Senior Product Designer - AI & Innovation Team 2023 - 2024
Microsoft (Cloud IntelliFrame, Microsoft Teams)

- **Led UX for Cloud IntelliFrame**, an AI-powered multi-stream video feature in Microsoft Teams that intelligently frames in-room participants to improve meeting equity and hybrid collaboration.
- Partnered closely with product, data science, and engineering in rapid innovation sprints to **prototype, validate, and ship AI-driven features**.
- Conducted usability research to inform roadmap decisions and feature adoption.
- **Built internal tools for data analysis**, led live data collection sessions, integrating telemetry and production logs to support AI model evaluation and UX iteration.
- Defined **ethical AI interaction patterns** emphasizing transparency, privacy, and trust.

UX Designer II - Advanced Technology Lab 2022 - 2023
Microsoft (AI Platform, Microsoft Teams)

- Owned end-to-end UX for **AI-powered MVPs** across post-meeting experiences, meeting insights and conversational AI.
- Partnered with data scientists and engineers to **refine AI algorithms** through **annotated datasets**, improving model quality, and iterative prototyping.
- Initiated and led internal **hackathon projects** around Copilot, improving transcript accuracy and AI explainability - recognized by leadership and integrated into roadmap planning.

UX Designer - Advanced Technology Lab 2018 - 2022
Microsoft (AI Platform, Microsoft Teams)

- Designed **transcript-driven workflows** later adopted within Microsoft Teams to enhance post-meeting productivity.
- Contributed to **Microsoft Fluent Design System**, helping to shape a scalable, cross-platform component library across Windows, Web, iOS, and Android.
- Partnered with engineering to ensure production-quality implementation of AI-driven experiences.
- Conducted independent M.A. research (outside Microsoft) on **emotional interaction with non-humanoid robotics among elderly populations**, strengthening my expertise in human-AI trust and adoption.

Skills

Agentic UX & AI Workflow Design · AI-Integrated UX Design · User Research & Behavioral Data Analysis · Rapid Prototyping & Simulation · Storytelling & Concept Communication · Ethical AI & Trust Design · UX Strategy for Emerging Tech · Agile & Sprint-Based Collaboration · Design Systems & Scalable UI · Facilitating Cross-Functional Design · Front-End Design Implementation

Main Tools

Figma / Make · Cursor · Custom GPTs · Lovable · Adobe Premiere / AE · Framer · Customer.io · PostHog

Education

- **Bachelor of Design in Visual Communication**, Bezalel Academy of Art and Design, 2014-2018
- **Master of Arts in Human Computer Interaction**, Reichman University, Media Innovation Lab, 2020-2022

Languages

- **English:** High-Leveled
- **Hebrew**

Additional

- 2008-2012: Officer, Artillery Corps.

Volunteering

- 2015-2016: Co-established a retail-food cooperative in Jerusalem. Managed the design and marketing group.
- 2021: Led design and user research in Microsoft Hackathon for the accessibility-focused project VoiceTyping++, supporting mid-stage ALS users, and presenting the work at IsraHCI and internal Microsoft events.
